## 1. Introduction

Mission X is a next-generation initiative that bridges the world of digital finance with real-world humanitarian impact. Built around a simple yet powerful idea — **as our community grows, so does our global contribution** — Mission X aims to redefine what it means to be a crypto project with purpose.

With every step forward in market capitalization, we commit to structured, verifiable donations to proven charitable organizations. Our first official partner is [GiveDirectly](#), a globally recognized NGO focused on unconditional cash transfers to those in need.

Mission X is deployed on the Solana blockchain, enabling fast, low-cost transactions and transparent fund flows.

---

## 2. Vision & Mission

### Vision

To become a blueprint for socially impactful crypto projects — proving that financial growth and humanitarian aid can go hand in hand.

### Mission

To build a token ecosystem that automatically supports real-world causes through milestone-based and community-led donations.

---

## 3. Charity Model

### Milestone Donations

Mission X is designed to donate from its **developer wallet** at specific market capitalization checkpoints. These donations are hardcoded into the project's values and are fully verifiable on-chain.

#### Market Cap Milestone Donation % from Dev Wallet

\$200,000	1%
\$500,000	1%
\$750,000	1%
\$1,000,000	1%
\$5,000,000	0.5%
\$10,000,000	0.5%

#### Total Dev Wallet Donation Commitment: 5%

Transparent, irreversible, and tied to growth.

### Community Donation Wallet

In addition to dev wallet-based donations, Mission X operates a **dedicated donation wallet** where anyone can contribute voluntarily. **95% of all funds** sent to this wallet are donated to our selected charity partner **every 24 hours** through an automated, publicly viewable script.

The remaining **5%** is used to help sustain and expand the Mission X project — covering essentials like operational costs, development, and communication.

---

### 4. Charity Partner – GiveDirectly

After evaluating multiple candidates, Mission X has officially partnered with [GiveDirectly](#), one of the most efficient and transparent charitable organizations globally.

#### Why GiveDirectly?

- Global leader in direct cash transfers
- Transparent operations and data-backed results
- Proven humanitarian impact
- Low overhead, maximum efficiency

Our milestone donations and community contributions will directly fund GiveDirectly's life-changing programs.

---

### 5. Tokenomics

Category	Allocation
Public Liquidity	94%
Developer Wallet	6%
<ul style="list-style-type: none"><li>• <b>Dev Wallet (6%)</b><ul style="list-style-type: none"><li>○ Up to <b>5%</b> is reserved for milestone-based donations</li><li>○ The remaining 1% supports essential development and maintenance</li></ul></li><li>• <b>Token Ticker:</b> TBA</li><li>• <b>Blockchain:</b> Solana</li><li>• <b>Launch Platform:</b> Pump.fun</li><li>• <b>Initial Liquidity:</b> 100% community-owned</li></ul>	

---

### 6. Launch Platform: Pump.fun

Mission X will launch on [Pump.fun](#), a trusted and transparent platform on Solana.

#### Why Pump.fun?

- **Fair launch** with no insider allocations or pre-sales
- **Fully on-chain and open-source** process
- **Pure market-driven price discovery**
- **Equal access for all participants**

This ensures Mission X starts without favoritism, creating a truly decentralized and community-first environment from day one.

## 7. Use of Funds

Mission X maintains a minimal and transparent fund structure:

- **94% Liquidity Pool** via Pump.fun
- **6% Developer Wallet**
  - 5% for charity milestone donations
  - 1% reserved for project sustainability

No tokens are allocated to private investors, advisors, or marketing reserves. All growth is organic and community-driven.

---

## 8. Roadmap

### Phase 1: Vision & Research / Q4 2024

#### Building the Foundation

- Market research and concept development
  - Identifying charitable organizations
  - Initial team formation
  - Project strategy planning
- 

### Phase 2: Partnership / Q1 2025

#### Creating Strong Alliances

- Initial contact with organizations
  - Partnership discussions
  - Collaboration strategy development
  - Marketing plan creation
- 

### Phase 3: Launch / Q2 2025

#### Taking Flight

- Token launch on Solana (via Pump.fun)
- Website deployment
- Social media launch
- Community outreach

**Q2 2025**

---

### Phase 4: Community / Q2 2025

#### Growing Together

- Community building initiatives
- Social media expansion
- Ambassador program launch
- Regular community events

## Phase 5: Network / Q2 2025

### Expanding Influence

- Onboarding crypto influencers
  - Financial sector outreach
  - Brand ambassador program
  - Charity network expansion
- 

## Phase 6: Institution / Q3 2025

### Building Legacy

- Institutional partnerships
  - Platform enhancement
  - Global expansion
  - Long-term sustainability planning
- 

## 9. Transparency & Integrity

Mission X operates under full transparency:

- All milestone donations and community contributions are visible on-chain
- Donation wallet flows are automated and public
- 5% donation commitment from the dev wallet is tracked and enforced

There are no hidden wallets, private deals, or backdoor mechanics. Everything is traceable and designed for accountability.

---

## 10. Security

- **On-chain token launch** with no manual intervention
  - **No private allocations**, no team pre-mint
  - **Audit-ready structure** for future review
  - All funds and wallet activity publicly viewable
- 

## 11. Conclusion

Mission X turns speculation into support. With every milestone, we move closer to proving that crypto can empower not just investors — but the world. Backed by a trusted charity, fair launch principles, and transparent fund flows, Mission X is designed to deliver **real growth and real impact**.
